PRODUCT

DYNAMIC STORAGE THROUGHOUT THE ENTIRE COMPANY

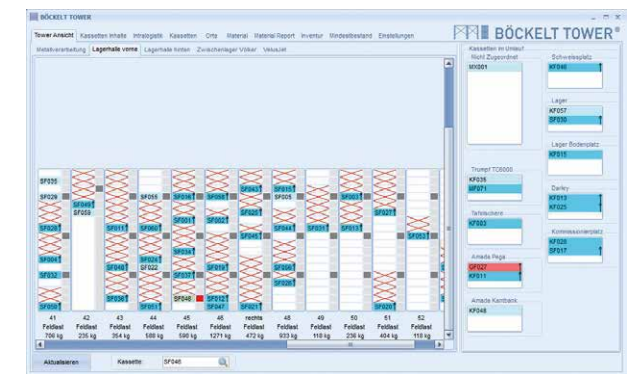

BÖCKELT TOWER® compared to a conventional heavy duty rack with an identical load

ADVANTAGES:

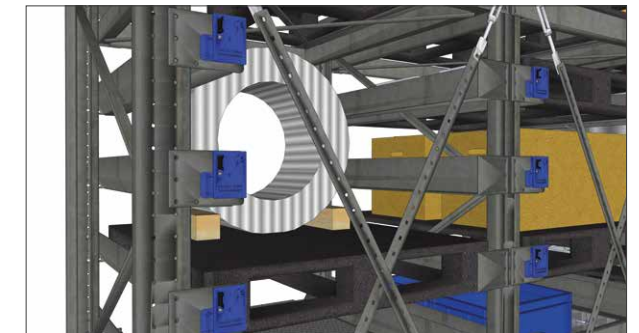

- **Intelligent storage management system and material flow management**
- Optimum utilisation of the available space and high capacity thanks to a loading height that allows for flexible use
- Direct access to all stored goods
- Sturdy and long-lasting design
- Increased on-the-job safety thanks to standardised load carriers and integrated push-through guards
- Electronics installed in an impact-proof enclosure
- Compact load carriers for safe transport and narrow routes
- Load carriers designed for flexible use
- Reduced risks arising from damaged load carriers / wooden pallets
- Effortless expansion or conversion thanks to modular design

STORAGE MANAGEMENT AND MATERIAL FLOW:

- Networking of any number of individual systems at different locations
- Control of in-house logistics processes
- Continuous material tracking with RFID technology
- Management and overview of all stock levels in real time using a storage management software with multi-user support
- Flexible interfaces with a variety of ERP systems
- Extra fast retrieval from inventory thanks to Pick by Light
- Dynamic materials management instead of fixed storage locations
- Support for multiple simultaneous access

Support by a management software that allows for simple, yet highly efficient storage by utilising the existing storage heights to the maximum
